

Task Lists and Submission Date

March 12th is highlighted because it marked the end of the sprint. Due to the time I allocated to the AF assignment, I was unable to complete the tasks beforehand. Below is a list of tasks that prevented me from attending my Viva Slot on March 12th, 2025, at 7:30 PM.

COPP-3773

I had to create a mindmap on how the implementation was going to be carried out, and I had a sprint review later that evening discussing this mind map, which I created. This was a critical task that should have been completed the day before, but I was not able to. **I have attached a glimpse of that meeting to the email. I am not allowed to show the entire video.**

COPP-4059

I had to automate a list of test cases, and this was due on the 12th as well. The automation was related to a critical component of one of our services. All the implementation was done was pushed to Github.

Tested and Verified

Test cases were written to test the new API by using substitute items which are not orderable as parameters. All the test cases in the QMetry Folder ([Link](#)) except with the type=S were automated. Below test cases were written and implemented except for COPP-TC-2960,COPP-TC-2961 and COPP-TC-2962. All the implementation is pushed to separate branch. Github Branch ([Link](#))

- COPP-TC-2947 - **PASSED**
- COPP-TC-2948 (Force Subs + Never Subs) - **PASSED**
- COPP-TC-2949 (Force Subs + No Subs) - **PASSED**
- COPP-TC-2950 (Force Subs + No Suitable Subs) - **PASSED**
- COPP-TC-2951 (BOS only) - **PASSED**
- COPP-TC-2952 (BOS + Never Subs) - **PASSED**
- COPP-TC-2953 (Merch Subs Only) - **PASSED**
- COPP-TC-2954 (Merch Subs + Never Subs) - **PASSED**
- COPP-TC-2955 (Merch Subs + No Subs) - **PASSED**
- COPP-TC-2956 (Merch Subs + No Suitable Subs) - **PASSED**
- COPP-TC-2957 (BOS + No Subs) - **PASSED**
- COPP-TC-2958 (Merch Subs + BOS) - **PASSED**
- COPP-TC-2959 (BOS Subs + No Subs + Never Subs) - **PASSED**
- COPP-TC-2960 - **PASSED**
- COPP-TC-2961 - **PASSED**
- COPP-TC-2962 - **PASSED**

Further details regarding the testing is mentioned in the document.

COPP-4309

I had to close this Critical bug as well because this feature was going to be deployed to production next week.

Projects / Customer Order Prefe... / COPP-3773 / COPP-4309

[SCOPP][QA] Error when updating the 3P Products Enabled Flag from True to False after the initial update.

+ Add

@ Apps

Description

Steps to create this scenario

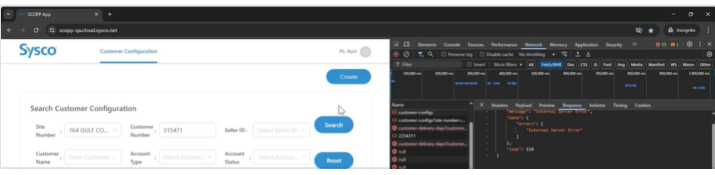

1. Create a customer config with 3P Products Enabled Flag set to True or False.

2. Update the customer config by updating the 3P Products Enabled Flag.

3. Update the 3P products Enabled Flag again.

4. Internal Server Error will be thrown.

Video steps to recreate the scenario

Tested and Verified

Update Response

The screenshot displays the Sysco Customer Configuration web application. A notification at the top right states "Customer Configuration updated successfully". The main interface includes a search form with fields for Site Number (056 BOSTON), Customer Number, Seller ID, Customer Name, Account Type, and Account Status. Below the search form, a table titled "Search Results" lists customer configurations. The table has columns for Site Number, Customer Number, Seller ID, Customer Name, Account Type, Account Status, and Action. The results show four entries for site 056, all with account status "ACTIVE".

Site Number	Customer Number	Seller ID	Customer Name	Account Type	Account Status	Action
056	904431	USBL	1910 KEE CHILD ACTION EP	LCC	ACTIVE	[Edit]
056	103639	USBL	101 DBLLE	TRK	INACTIVE	[Edit]
056	168169	USBL	107 TAP	TRK	ACTIVE	[Edit]
056	160060	USBL	NORCOCKS LOUNGE & TAPIS	TRK	ACTIVE	[Edit]

On the right side, a network monitor overlay shows a REST client request to "customer-delivery-edge/customers/056/2607676". The response is a JSON object containing customer configuration details.

```
{  "customerConfig": {    "customerID": "0616436",    "parentCustomer": null,    "productRestrictions": null,    "productSubscriptions": null,    "parentSubscriptions": null,    "dayReference": null,    "summaryLevel": null,    "isConfigActive": null,    "isSubscriptionsEnabled": false  }  }
```

Create Response

The screenshot displays the Sysco Customer Configuration web application. A notification at the top right states "Customer Configuration created successfully". The main interface includes a search form with fields for Site Number (056 BOSTON), Customer Number, Seller ID, Customer Name, Account Type, and Account Status. Below the search form, a table titled "Search Results" is visible but empty. On the right side, a network monitor overlay shows a REST client request to "customer-delivery-edge/customers/056/2607676". The response is a JSON object containing customer configuration details.

```
{  "customerConfig": {    "customerID": "2204803",    "customer": "TRK",    "customerNumber": "809026",    "parentCustomer": null,    "productRestrictions": null,    "productSubscriptions": null,    "parentSubscriptions": null,    "dayReference": null,    "summaryLevel": null,    "isConfigActive": null,    "isSubscriptionsEnabled": true  }  }
```
